

# Human-AI Partnership Reflection

## Student Self-Assessment

Name: \_\_\_\_\_ Date: \_\_\_\_\_ Activity: \_\_\_\_\_

### Part 1: Working with AI

How I treated AI during this activity:

*(Check all that apply)*

- ☐ I asked AI questions like I would ask a search engine
- ☐ I talked to AI like it was a team member helping solve a problem
- ☐ I asked AI to explain its thinking
- ☐ I questioned whether AI might be wrong
- ☐ I combined what AI found with what I figured out myself

The most helpful thing AI contributed was:

---

---

Something AI got wrong or couldn't help with:

---

---

### Part 2: Human-AI Teamwork

What I (as a human) contributed that AI couldn't:

---

---

What AI contributed that I couldn't do as well:

---

---

**An insight that came from combining human + AI perspectives:**

---

---

### **Part 3: Decisions and Trust**

**When I trusted AI's analysis, I trusted it because:**

---

---

**When I doubted or questioned AI, it was because:**

---

---

**A decision I made that balanced AI recommendations with my own judgment:**

---

---

### **Part 4: Career Connections**

**This activity reminded me of what these cybersecurity professionals do:**

*(Check all that apply)*

- ☐ Cyber Defense Analyst (monitors for threats, analyzes security data)
- ☐ Incident Responder (handles security breaches and attacks)
- ☐ Security Policy Specialist (creates rules for security systems)
- ☐ Digital Forensics Investigator (investigates security incidents)
- ☐ Other: \_\_\_\_\_

**What interests me about this type of work:**

---

---

**Questions I have about cybersecurity careers:**

---

---

### **Part 5: Self-Assessment**

**Rate yourself on these partnership skills:**

| Skill  | Not Yet (1) | Getting There (2) | Got It (3) | Expert (4) |
|--|-------------|-------------------|------------|------------|
| Treating AI as partner (not just tool)       |             |                   |            |            |
| Knowing what AI does well vs. what I do well |             |                   |            |            |
| Questioning AI when needed                   |             |                   |            |            |
| Combining AI + human perspectives            |             |                   |            |            |
| Connecting activity to real careers          |             |                   |            |            |

**One thing I want to get better at:**

---

---

**One thing I learned about working with AI:**

---

---

**Instructor Notes**

*(For educator use only)*

**Observation notes:**

---

**Strengths demonstrated:**

---

**Areas for growth:**

---

**Career interest indicators:**

---
